

Recombinant Monkeypox Virus Envelope protein A28 homolog, A30L

Source	
Species	Monkeypox Virus (MPXV)
Accession Number	Q8V4U9
Gene Symbol	A30L
Expressed Region	Gln22-Leu146
Preparation	
Expression System	Human embryonic kidney 293 (HEK293) cells
Тад	C-terminal His-tag
Purification	His-tag affinity purification by immobilized metal ion affinity chromatography (IMAC)
Purity Determined By	SDS-PAGE under reducing conditions and visualized by Coomassie blue staining
Molecular Weight	Recombinant protein product has a calculated molecular mass of ?14 kDa. Due to the abundant glycosylation, it migrates as approximately ?20-30 kDa protein bands in SDS-PAGE under DTT, beta-mercaptoethanol reducing conditions.
Protein Specifications	
Format	Lyophilized powder
Formulation	Lyophilized from a 0.2 um filtered solution in PBS (pH 7.4) with 1% mannitol and 5% trehalose
Concentration	Determined by BCA protein assay
Endotoxin Level	0.5 EU per μ g of the protein as determined by the LAL method
Endotoxin Level Recommended Applications	
	0.5 EU per μg of the protein as determined by the LAL method Functional Assay, Protein-protein Interaction, Post-translational Modifications, ELISA, EIA,
Recommended Applications	0.5 EU per µg of the protein as determined by the LAL methodFunctional Assay, Protein-protein Interaction, Post-translational Modifications, ELISA, EIA, Western Blotting, Dot Blotting, Immunoprecipitation, Protein Array, etc.Briefly spin the vial and bring the contents to the bottom prior to opening. It is recommended to
Recommended Applications Reconstitution	 0.5 EU per µg of the protein as determined by the LAL method Functional Assay, Protein-protein Interaction, Post-translational Modifications, ELISA, EIA, Western Blotting, Dot Blotting, Immunoprecipitation, Protein Array, etc. Briefly spin the vial and bring the contents to the bottom prior to opening. It is recommended to reconstitute at 0.5 - 1 mg/mL with sterile deionized water.

Shipping

Ice packs

Storage/Stability

Upon arrival, the protein may be stored for 2 weeks at 4 °C. For long term storage, it is recommended to store at -20 °C or -80 °C in appropriate aliquots. Avoid repeated freeze-thaw cycles.

This product is furnished for LABORATORY RESEARCH USE ONLY.

Not for diagnostic or therapeutic use.
